OUR HISTORY

For more than 30 years ...

Since **1989**, QOVANS® company offers through its brand SANICLIPS®, a large range of **cubicles**, of **lockers** and of **sanitary equipment** for the interior fitting of **camping, swimming pools, schools, collectivities, leisure center, hospitals, offices ...**

Made to resist to extreme conditions of use, the SANICLIPS® products answer to **high manufacturing standards** guaranteeing a high quality finish and a perfect aesthetic.

Recognized by architects and persons dedicated to this specific industry, the range SANICLIPS® offers **sustainable** materials that save the maintenance costs and brings together a set of services that give a real **success** to the SANICLIPS® brand today.

Made in France

Located in **Normandy** on an industrial site of **30 000 sq/m**, Qovans® owns an important and performing industrial production tool :

A machining **unit** for laminate panels

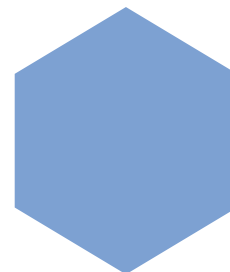

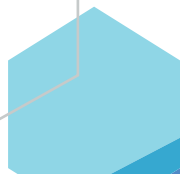

A **profile** aluminium **process** unit

A **powder coating** line

Our expertise is recognized thanks to :

- A **performing quality control process**,
- A **logistics department** integrated and dedicated to the delivery of our products,
- A **know how** and a **skilled staff** in this field of activity.

LAMINATE COMPACT

Compact laminate panels are made up of 2 decorative sheets, 70% **kraft paper** and 30% **thermosetting resins**.

The panel is **rot-proof**, **water-repellent** and **extremely resistant to external aggression** (impact, abrasion, chemicals, oxidation, etc.).

The laminate compact panels of the all range Saniclips® benefit of anti bacteria **protection Sanitized®**. Based on antiseptic action of silver ions, the Sanitized protection reduce strongly the proliferation of bacteria throughout the panel use.

The efficiency of Sanitized® anti bacteria treatment, it is **99,9% of annihilated bacteria**.

Resistance to cracking

Shock resistance

Abrasion resistance

Resistance to humidity

Colour fastness to artificial light

Scratch resistance

Easy maintenance

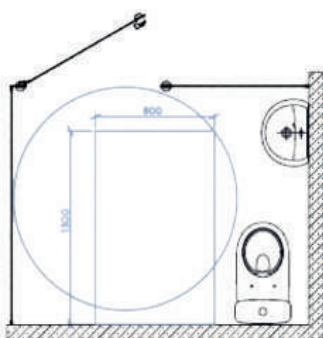

Resistance to chemicals

Norms and rules

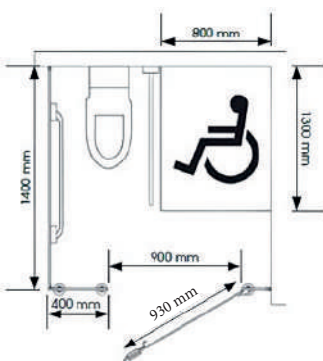

Fire Reaction

Sanitary cubicles in laminate compact are considered as large furniture, then a fire regulation of M3 is required. Saniclips® respects and overtakes the norm thanks to the panels used that are classified M2 (C-s1,d0). A version M1 is available on request.

Accessibility and PRM

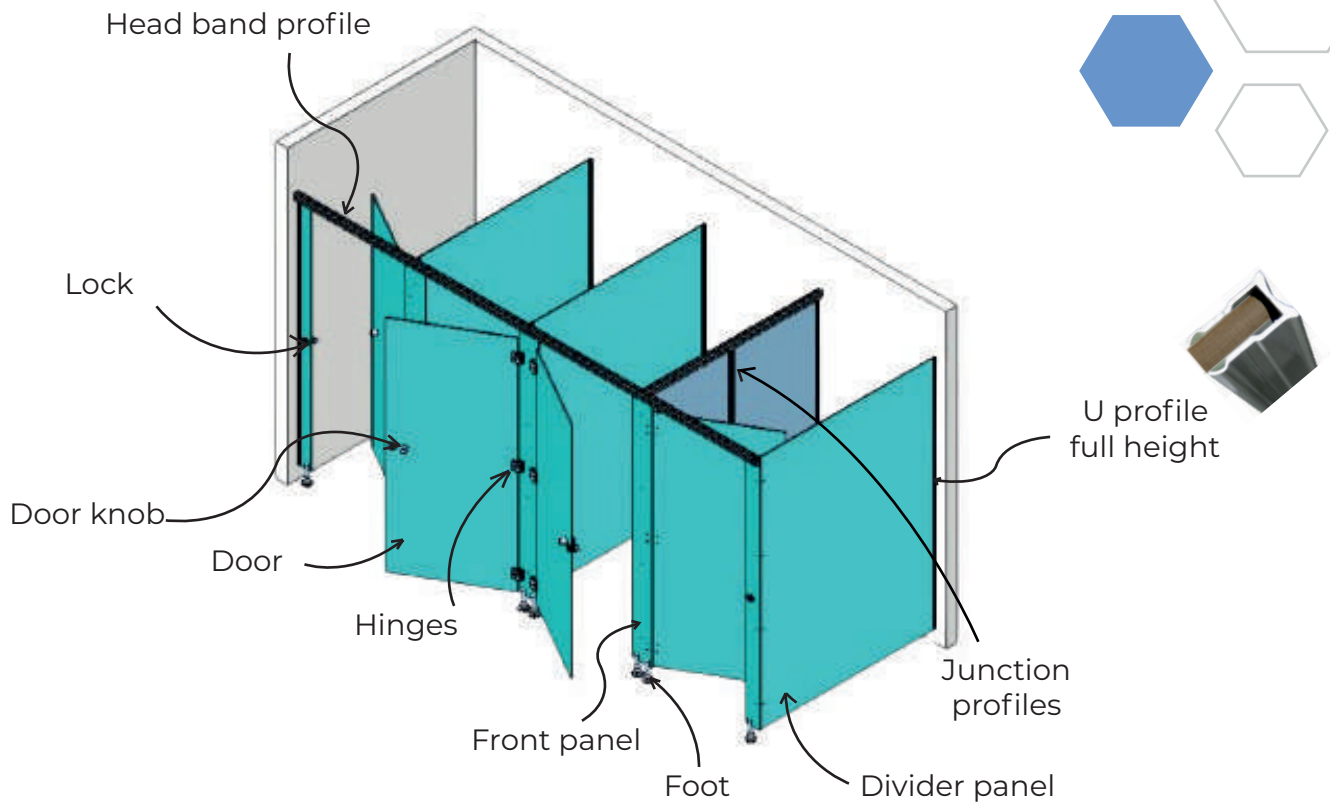

Following the rules, the minimum allowed passage of a door for a non adapted cubicle is fixed to 800mm and accepted up to 780mm.

All Saniclips® standard dimensions comply with accessibilities norms to persons with reduced mobility.

(law of 11 February 2005 for equal opportunities law).

TECHNICAL DESCRIPTION

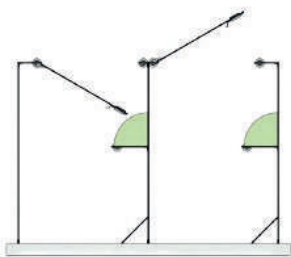

Uses and implantations

WC cubicle, Washbasin, shower or changing room, the uses are versatile.

The equipments diversity gives to cubicles a multiplicity of use.

The implantation varies following the project because of Saniclips® cubicles can be installed between 3 walls, 2 walls or simply fixed against one wall.

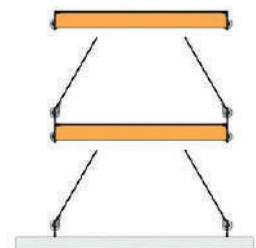

The door opening direction fit also, between interior or exterior opening.

Shower screen and towel holder, 1/4 round bench, shower angle panel

Bench, vanity units, wall panelling support frame

Simultaneous closing of 2 doors

CUBICLES - EPURE 10

The Epure cubicles are specially designed to answer to requests to Establishment Open to the Public.

From laminate compact panel for the **easy maintenance** and **the resistance to impacts**, to **abrasion** and to **scratches**.

From accessories specifically chosen for their durability and the design of the product.

From full height profiles and a system of montage easing a quick and solid installation

Accessories

Grey nylon

Black nylon

Anodised aluminium

Stainless steel

Technical characteristics

Panels

Compact laminate 10 mm

Height

Max 2150 mm - 2020
+ ground clearance 90 to 130 mm

Assembly
